EDUCATION

JSS Academy of Technical Education, Bengaluru, India Bachelors of Engineering in Electronics and Communication Engineering	Aug 2019 - Jul 2023 CGPA: 8.0/10.0
--	---------------------------------------

EXPERIENCE

Cognizant
Virtual Experience Program

- Completed practical task modules under various topics.

Vodafone Idea Foundation
Summer Internship

- Worked on a project along with my team members.
- It was a project based upon Data Science.

IFORTIS WORLDWIDE
Corporate Ambassador

- Completed task assigned by my Mentor.
- It helped me build my leadership quality and my managerial abilities.

ACHIEVEMENTS

- Participation Badge recieved from Atlassian Women in Tech
Handle Link : [↗](#)
- Campus Ambassador for IIIT HYDERABAD

PROJECTS

- LearnNest:**
 - The LearnNest MERN app is a dynamic and user-friendly course selling platform, meticulously crafted using the cutting-edge MERN stack (MongoDB, Express.js, React, Node.js). Seamlessly integrated with an intuitive admin dashboard, LearnNest empowers administrators with effortless control over course management through comprehensive CRUD operations.

 - Github Repo** [↗](#)
- Restaurant App:**
 - It is a user-friendly web application using React. To handle different parts of the app, I've used handy tools like custom hooks, React Router for navigation, and Redux Toolkit for managing the application's state effectively. The app allows users to search for items right from the header, and they can even filter items by their priority and sort them by price. Users can mark items they like as favorites, and easily access them on a dedicated favorites page.To fetch a list of products api is used.

 - Github Repo** [↗](#)
- IMDB Clone:**
 - An IMDb clone built using React is like a web application that mimics the functionality and design of the original IMDb website. Application is built using React as the front-end framework, along with other technologies such as JavaScript, HTML, and CSS. The application also required a back-end server to store and retrieve data, which is built using APIs such as the Open Movie Database API.

- Weather Display App :**
 - A weather display app using JavaScript is a web-based application that displays real-time weather information for a particular location. The app use s APIs to fetch data about the weather for the user's location and display it in a visually appealing way. The app is built using HTML, CSS, and JavaScript. The JavaScript code will handle the API requests and the rendering of the weather data.

TECHNICAL SKILLS

- Programming languages:** C++,C
- Web Technologies:** HTML, CSS, JavaScript,ReactJS,Bootstrap,Material UI,Node.js,Express.js,MongoDb
- Coursework:** Data Structure and Algorithm, Object Oriented Programming
- Framework/Tools:** Git,Linux,VSCode

CERTIFICATES

- Certificate for internship as an Campus Ambassador at INTERN BUG.
- Certificate of Achievement by GOOGLE Digital Garage.
- Certificate of participating in UI/UX workshop organized by Kaarwan.
