#### EDUCATION

JSS Academy of Technical Education, Bengaluru, India

Bachelors of Engineering in Electronics and Communication Engineering

Aug 2019 - Jul 2023 CGPA: 8.0/10.0

#### EXPERIENCE

# **Vodafone Idea Foundation**

June 2022 - August 2022 Remote

Summer Internship

• Domain of Internship: Data Science

• Internship Focus: Predicting Acute Plant Diseases

### TECHNICAL SKILLS

**Programming Languages:** C++, C, JavaScript, TypeScript

Web Technologies: HTML, CSS, Tailwind, MUI, Bootstrap, ReactJS, Redux, Recoil, NodeJs, Express, MongoDB

Coursework: DSA, Problem Solving, DBMS, Computer Networks

Framework/Tools: Git, GitHub

# **PROJECTS**

### Course Selling App:

- The website is a dynamic and user-friendly course selling platform, meticulously crafted using the cutting-edge MERN stack (MongoDB, Express, ReactJS, Node.js). Seamlessly integrated with an intuitive admin dashboard, The site empowers administrators with effortless control over course management through comprehensive CRUD operations.

- Github Repo

#### Restaurant App:

- It is a user-friendly web application made using ReactJS, custom hooks, React Router for navigation, and Redux Toolkit for managing the application's state effectively. The app allows users to search for items right from the header, and they can even filter items by their priority and sort them by price. Users can mark items they like as favorites, and easily access them on a dedicated favorites page.

- Github Repo

# **IMDB Clone:**

- An IMDb clone built using React is like a web application that mimics the functionality and design of the original IMDb website. Application is built using React as the front-end framework, along with other technologies such as JavaScript, HTML, and CSS. The application also required a back-end server to store and retrieve data, which is built using APIs such as the Open Movie Database API.
